How to get the best photo for KPC cutouts

- 1. Get a friend to take your picture—no selfies!
For best results, use the rear facing camera.*
- 2. Find good lighting and face it. Make sure it's not behind you.*
- 3. Face the camera and capture at least your waist up.*
- 4. Have your fellow friend stand 4 ft. away and hold the phone vertically when taking a picture.*
- 5. Keep your hand gestures within your body width.*
- 6. Only one person per photo.*
- 7. Smile!*
